

## Candidate Details

|                   |                                                                                                             |
|-------------------|-------------------------------------------------------------------------------------------------------------|
| Ballot paper name | <b>KO, Viktor</b>                                                                                           |
| Candidate name    | <b>Viktor Andrew KO</b>                                                                                     |
| District          | <b>City of Perth</b>                                                                                        |
| Nominating for    | <b>Lord Mayor for City of Perth</b>                                                                         |
| Election type     | <b>Ordinary</b>                                                                                             |
| Enrolment status  | <b>KO, Viktor is eligible to stand for election as the owner of rateable property in the City of Perth.</b> |

I am a ratepayer, councillor and medical doctor. For **five years** on the City of Perth Council I have supported community events, overseen **five budgets** and advocated for **lower rates** with **fiscal responsibility**.

Perth has been my home and workplace for over a decade. During COVID-19 I joined the State's vaccination rollout to **protect** our community, cared for the vulnerable through '*Homeless Healthcare*', running clinics at **Tranby Unity, RUAH** and **St Bart's**. I gained my Fellowship in General Practice (FRACGP) before returning to Royal Perth Hospital as a State Trauma Registrar, caring for the sickest **Western Australians**.

I am socially, **not** financially invested in Perth and hold no business interests. Our city does not need another MBA or savior independent. It needs someone who can **bring people together**. As a doctor, my team would be inclusive, I bring not just **leadership** on safety, but **expertise** to guide Perth's future with **evidence, compassion** and **care**.
